## **Blue Light Emergency Communications System**

*Jennifer Andrews, Easter Hall-Beyer, LaTisha Idlewine,  
Luke Piersall, Randy Rollo, Steve Shaw, Eric Wietholter*

In today's world, staying on top of safety and solutions can be a daunting task. Unforeseen situations can arise anytime in the blink of an eye. It is better to be prepared. Our Leadership team decided that focusing on safety would be our number one priority.

We were fortunate to receive funds from the Blue River Foundation to help with the order completion. Our project consisted of the installation of a Blue River Emergency Light system on the Blue River Trail. Due to electrical needs and costs, the system was installed on the side of the trail restrooms. With the help and generosity of TUBESOCK, this system was installed at no additional cost to our team. This emergency system not only adds additional lighting to the trail but provides a direct line of communication to the police department during an emergency. It is a reliable communication system to improve public safety and provide peace of mind in any situation. With the low maintenance costs each year, this system will prove to be an asset to the community for years to come!
